

# Honeywell

Here's the key  
to finishing  
large building projects  
on-time and on-budget.

# ACS means ACCESS.

*Large-scale renovation? Big new-construction project? To get the job done right, you need access to the best equipment and expertise.*

*From HVAC control solutions to building-automation systems, the key to access is a Honeywell Automation & Control Specialist (ACS). These independent contractors sell and install Honeywell EXCEL 5000® OPEN™ Systems and field devices, giving you access to:*

- Honeywell HVAC control solutions, building automation, systems integration, remote monitoring and product and technical support
- Real cost-savings during system startup
- Exclusive ACSELON® software
- Better overall efficiency and operation for your building—now and in the future

## **ACS contractors meet the following Honeywell requirements:**

- Trained to engineer and install Honeywell systems and field devices
- In-house building automation engineering and project management expertise
- Proven performance in commercial HVAC control installations

*ACS contractors give you access to flexible solutions like Honeywell EXCEL 5000® OPEN™ Systems*

**EXCEL 5000 OPEN**

**The key**  
to your next construction  
or renovation is a  
**Honeywell ACS contractor.**
